The Europeana Aggregators Forum (EAF) and the Europeana Foundation (EF) are glad to welcome Public Library - Varna operated by Pencho Slaveykov' Regional Library as an accredited aggregator to the Europeana service.

The Europeana initiative builds on a network of national, thematic and domain aggregators enabling cultural heritage institutions across Europe to share their content with Europeana and open it up to new audiences. Public Library - Varna has been recognised as an active member of this network and a constituent part of the Europeana ecosystem.

Public Library - Varna is contributing to the Europeana initiative working with cultural institutions and collectors to gather authentic, trustworthy and robust data and make it accessible to Europeana. This also makes it available to education and research infrastructures, creatives, developers and the general public. Public Library - Varna has also been recognised as an important source of expertise, offering advice and support in digitisation, content description, metadata mapping, licensing, media formats, accessibility, multilingualism and in the adoption of controlled vocabularies.

Public Library - Varna, by virtue of its activities and its contribution to the Europeana initiative, has been appointed as a full member of the Europeana Aggregators Forum network of national, thematic and domain aggregators for digital cultural heritage in Europe.
